Printed on acid-free paper

Dedicated to my lovely wife, Jacqui Griffyth. (And also to Peanut.)

Table of Contents

About the Author xxiii

About the Technical Reviewer xxv

Part I: Getting Started with Angular 1

Chapter 1: Getting Ready 3

What Do You Need to Know? 3

What Is the Structure of This Book? 4

Part 1: Getting Started with Angular 4

Part 2: Angular in Detail 4

Part 3: Advanced Angular Features 4

Are There Lots of Examples? 4

Where Can You Get the Example Code? 6

How Do You Set Up Your Development Environment? 6

Contacting the Author 6

Summary 6

Chapter 2: Your First Angular App 7

Preparing the Development Environment 7

Installing Node.js 7

Installing the angular-cli Package 8

Installing Git 8

Installing an Editor 9

Installing a Browser 9

Creating and Preparing the Project 10
Creating the Project 10
Adding the Bootstrap CSS Package 10
Starting the Development Tools 11
Editing the HTML File 12
Adding Angular Features to the Project 15
Preparing the HTML File 15
Creating a Data Model 16
Preparing the Template 18
Preparing the Component 18
Putting the Application Together 20
Adding Features to the Example Application 22
Adding the To-Do Table 23
Creating a Two-Way Data Binding 26
Adding To-Do Items 28
Summary 30
Chapter 3: Putting Angular in Context 31
Understanding Where Angular Excels 32
Understanding Round-Trip and Single-Page Applications 32
Comparing Angular to jQuery 33
Comparing Angular to React and Vue.js 34
Understanding the MVC Pattern 34
Understanding Models 36
Understanding Controllers/Components 38
Understanding Views/Templates 38
Understanding RESTful Services 39
Common Design Pitfalls 41
Putting the Logic in the Wrong Place 41
Adopting the Data Store Data Format 41
Just Enough Knowledge to Cause Trouble 42
Summary 42

Chapter 4: An HTML and CSS Primer 43

Preparing the Example Project 43

Understanding HTML 45

Understanding Void Elements 46

Understanding Attributes 46

Applying Attributes Without Values 46

Quoting Literal Values in Attributes 47

Understanding Element Content 47

Understanding the Document Structure 47

Understanding Bootstrap 49

Applying Basic Bootstrap Classes 50

Using Bootstrap to Style Tables 53

Using Bootstrap to Create Forms 54

Using Bootstrap to Create Grids 55

Summary 61

Chapter 5: JavaScript and TypeScript: Part 1 63

Preparing the Example Project 64

Understanding the Basic Workflow 66

Using Statements 66

Defining and Using Functions 67

Defining Functions with Parameters 69

Defining Functions That Return Results 70

Using Functions As Arguments to Other Functions 71

Using Variables and Types 72

Using Variable Closure 73

Using the Primitive Types 74

Using JavaScript Operators 76

Using Conditional Statements 77

The Equality Operator vs. the Identity Operator 78

Explicitly Converting Types 79

Working with Arrays 81
Using an Array Literal 81
Reading and Modifying the Contents of an Array 81
Enumerating the Contents of an Array 82
Using the Spread Operator 83
Using the Built-in Array Methods 83
Summary 85
Chapter 6: JavaScript and TypeScript: Part 2 87
Preparing the Example Project 87
Working with Objects 88
Using Object Literals 89
Using Functions as Methods 89
Defining Classes 90
Working with JavaScript Modules 93
Creating and Using Modules 94
Useful TypeScript Features 97
Using Type Annotations 97
Using Tuples 102
Using Indexable Types 103
Using Access Modifiers 103
Summary 105
Chapter 7: SportsStore: A Real Application 107
Preparing the Project 107
Installing the Additional NPM Packages 108
Preparing the RESTful Web Service 109
Preparing the HTML File 111
Creating the Folder Structure 112
Running the Example Application 112
Starting the RESTful Web Service 113

Preparing the Angular Project Features 113
Updating the Root Component 113
Updating the Root Module 114
Inspecting the Bootstrap File 114
Starting the Data Model 115
Creating the Model Classes 115
Creating the Dummy Data Source 116
Creating the Model Repository 117
Creating the Feature Module 118
Starting the Store 119
Creating the Store Component and Template 119
Creating the Store Feature Module 120
Updating the Root Component and Root Module 121
Adding Store Features the Product Details 122
Displaying the Product Details 122
Adding Category Selection 124
Adding Product Pagination 126
Creating a Custom Directive 130
Summary 133
Chapter 8: SportsStore: Orders and Checkout 135
Preparing the Example Application 135
Creating the Cart 135
Creating the Cart Model 135
Creating the Cart Summary Components 137
Integrating the Cart into the Store 139
Adding URL Routing 142
Creating the Cart Detail and Checkout Components 143
Creating and Applying the Routing Configuration 144
Navigating Through the Application 145
Guarding the Routes 148

Completing the Cart Detail Feature 150
Processing Orders 153
Extending the Model 153
Collecting the Order Details 156
Using the RESTful Web Service 160
Applying the Data Source 161
Summary 163
Chapter 9: SportsStore: Administration 165
Preparing the Example Application 165
Creating the Module 165
Configuring the URL Routing System 168
Navigating to the Administration URL 169
Implementing Authentication 171
Understanding the Authentication System 171
Extending the Data Source 172
Creating the Authentication Service 173
Enabling Authentication 174
Extending the Data Source and Repositories 177
Creating the Administration Feature Structure 181
Creating the Placeholder Components 181
Preparing the Common Content and the Feature Module 182
Implementing the Product Feature 185
Implementing the Orders Feature 189
Summary 191
Chapter 10: SportsStore: Progressive Features and Deployment 193
Preparing the Example Application 193
Adding Progressive Features 193
Installing the PWA Package 193
Caching the Data URLs 194
Responding to Connectivity Changes 195

Preparing the Application for Deployment 197
Creating the Data File 197
Creating the Server 198
Changing the Web Service URL in the Repository Class 200
Building and Testing the Application 200
Testing the Progressive Features 202
Containerizing the SportsStore Application 203
Installing Docker 203
Preparing the Application 203
Creating the Docker Container 204
Running the Application 205
Summary 207

Part II: Angular in Detail 209

Chapter 11: Creating an Angular Project 211
Creating a New Angular Project 211
Understanding the Project Structure 212
Understanding the Source Code Folder 214
Understanding the Packages Folder 216
Using the Development Tools 220
Understanding the Development HTTP Server 221
Understanding Hot Model Replacement 222
Using the Linter 223
Understanding How an Angular Application Works 226
Understanding the HTML Document 226
Understanding the Application Bootstrap 227
Understanding the Root Angular Module 228
Understanding the Angular Component 229
Understanding Content Display 229

Starting Development in an Angular Project 230
Adding the Bootstrap CSS Framework 231
Creating the Data Model 231
Creating a Component and Template 234
Configuring the Root Angular Module 236
Summary 236
Chapter 12: Using Data Bindings 237
Preparing the Example Project 238
Understanding One-Way Data Bindings 239
Understanding the Binding Target 241
Understanding the Expression 242
Understanding the Brackets 243
Understanding the Host Element 244
Using the Standard Property and Attribute Bindings 244
Using the Standard Property Binding 244
Using the String Interpolation Binding 246
Using the Attribute Binding 247
Setting Classes and Styles 249
Using the Class Bindings 249
Using the Style Bindings 254
Updating the Data in the Application 258
Summary 260
Chapter 13: Using the Built-in Directives 261
Preparing the Example Project 262
Using the Built-in Directives 264
Using the ngIf Directive 264
Using the ngSwitch Directive 267
Using the ngFor Directive 270
Using the ngTemplateOutlet Directive 280

Understanding One-Way Data Binding Restrictions 283
Using Idempotent Expressions 283
Understanding the Expression Context 286
Summary 289
Chapter 14: Using Events and Forms 291
Preparing the Example Project 292
Importing the Forms Module 292
Preparing the Component and Template 293
Using the Event Binding 294
Understanding Dynamically Defined Properties 296
Using Event Data 298
Using Template Reference Variables 300
Using Two-Way Data Bindings 302
Using the ngModel Directive 304
Working with Forms 305
Adding a Form to the Example Application 305
Adding Form Data Validation 308
Validating the Entire Form 318
Using Model-Based Forms 325
Enabling Model-Based Forms Feature 325
Defining the Form Model Classes 326
Using the Model for Validation 329
Generating the Elements from the Model 333
Creating Custom Form Validators 334
Applying a Custom Validator 335
Summary 337
Chapter 15: Creating Attribute Directives 339
Preparing the Example Project 340
Creating a Simple Attribute Directive 343
Applying a Custom Directive 344

Accessing Application Data in a Directive 345
Reading Host Element Attributes 345
Creating Data-Bound Input Properties 348
Responding to Input Property Changes 351
Creating Custom Events 353
Binding to a Custom Event 355
Creating Host Element Bindings 356
Creating a Two-Way Binding on the Host Element 358
Exporting a Directive for Use in a Template Variable 361
Summary 364
Chapter 16: Creating Structural Directives 365
Preparing the Example Project 366
Creating a Simple Structural Directive 367
Implementing the Structural Directive Class 368
Enabling the Structural Directive 371
Using the Concise Structural Directive Syntax 373
Creating Iterating Structural Directives 374
Providing Additional Context Data 377
Using the Concise Structure Syntax 379
Dealing with Property-Level Data Changes 380
Dealing with Collection-Level Data Changes 381
Querying the Host Element Content 392
Querying Multiple Content Children 395
Receiving Query Change Notifications 397
Summary 399
Chapter 17: Understanding Components 401
Preparing the Example Project 402
Structuring an Application with Components 403
Creating New Components 404

Defining Templates 408
Completing the Component Restructure 419
Using Component Styles 420
Defining External Component Styles 422
Using Advanced Style Features 423
Querying Template Content 430
Summary 433
Chapter 18: Using and Creating Pipes 435
Preparing the Example Project 436
Understanding Pipes 439
Creating a Custom Pipe 441
Registering a Custom Pipe 442
Applying a Custom Pipe 443
Combining Pipes 444
Creating Impure Pipes 445
Using the Built-in Pipes 449
Formatting Numbers 450
Formatting Currency Values 453
Formatting Percentages 456
Formatting Dates 458
Changing String Case 461
Serializing Data as JSON 463
Slicing Data Arrays 463
Summary 465
Chapter 19: Using Services 467
Preparing the Example Project 468
Understanding the Object Distribution Problem 469
Demonstrating the Problem 469
Distributing Objects as Services Using Dependency Injection 474
Declaring Dependencies in Other Building Blocks 480

Understanding the Test Isolation Problem 487
Isolating Components Using Services and Dependency Injection 488
Completing the Adoption of Services 491
Updating the Root Component and Template 491
Updating the Child Components 492
Summary 494
Chapter 20: Using Service Providers 495
Preparing the Example Project 496
Using Service Providers 498
Using the Class Provider 500
Using the Value Provider 508
Using the Factory Provider 510
Using the Existing Service Provider 513
Using Local Providers 514
Understanding the Limitations of Single Service Objects 514
Creating Local Providers in a Component 515
Understanding the Provider Alternatives 517
Controlling Dependency Resolution 522
Summary 524
Chapter 21: Using and Creating Modules 525
Preparing the Example Project 526
Understanding the Root Module 528
Understanding the imports Property 530
Understanding the declarations Property 530
Understanding the providers Property 531
Understanding the bootstrap Property 531
Creating Feature Modules 533
Creating a Model Module 535
Creating a Utility Feature Module 540
Creating a Feature Module with Components 545
Summary 550

Part III: Advanced Angular Features 551

Chapter 22: Creating the Example Project 553

Starting the Example Project 553

Adding and Configuring the Bootstrap CSS Package 553

Creating the Project Structure 554

Creating the Model Module 554

Creating the Product Data Type 554

Creating the Data Source and Repository 554

Completing the Model Module 556

Creating the Core Module 557

Creating the Shared State Service 557

Creating the Table Component 557

Creating the Form Component 559

Completing the Core Module 561

Creating the Messages Module 562

Creating the Message Model and Service 562

Creating the Component and Template 563

Completing the Message Module 563

Completing the Project 564

Summary 566

Chapter 23: Using Reactive Extensions 567

Preparing the Example Project 568

Understanding the Problem 569

Solving the Problem with Reactive Extensions 571

Understanding Observables 572

Understanding Observers 574

Understanding Subjects 575

Using the Async Pipe 577

Using the Async Pipe with Custom Pipes 578

Scaling Up Application Feature Modules 580
Going Beyond the Basics 582
Filtering Events 583
Transforming Events 584
Receiving Only Distinct Events 587
Taking and Skipping Events 589
Summary 591
Chapter 24: Making Asynchronous HTTP Requests 593
Preparing the Example Project 594
Configuring the Model Feature Module 595
Creating the Data File 595
Updating the Form Component 596
Running the Example Project 596
Understanding RESTful Web Services 597
Replacing the Static Data Source 598
Creating the New Data Source Service 598
Configuring the Data Source 600
Using the REST Data Source 601
Saving and Deleting Data 603
Consolidating HTTP Requests 606
Making Cross-Origin Requests 607
Using JSONP Requests 608
Configuring Request Headers 610
Handling Errors 613
Generating User-Ready Messages 614
Handling the Errors 615
Summary 617

Chapter 25: Routing and Navigation: Part 1 619

Preparing the Example Project 620

Getting Started with Routing 622

Creating a Routing Configuration 623

Creating the Routing Component 625

Updating the Root Module 625

Completing the Configuration 626

Adding Navigation Links 627

Understanding the Effect of Routing 630

Completing the Routing Implementation 632

Handling Route Changes in Components 632

Using Route Parameters 635

Navigating in Code 641

Receiving Navigation Events 643

Removing the Event Bindings and Supporting Code 645

Summary 648

Chapter 26: Routing and Navigation: Part 2 649

Preparing the Example Project 649

Adding Components to the Project 653

Using Wildcards and Redirections 656

Using Wildcards in Routes 656

Using Redirections in Routes 659

Navigating Within a Component 661

Responding to Ongoing Routing Changes 662

Styling Links for Active Routes 664

Fixing the All Button 668

Creating Child Routes 669

Creating the Child Route Outlet 670

Accessing Parameters from Child Routes 673

Summary 676

Chapter 27: Routing and Navigation: Part 3 677

Preparing the Example Project 677

Guarding Routes 679

Delaying Navigation with a Resolver 680

Preventing Navigation with Guards 687

Loading Feature Modules Dynamically 700

Creating a Simple Feature Module 701

Loading the Module Dynamically 702

Guarding Dynamic Modules 705

Targeting Named Outlets 708

Creating Additional Outlet Elements 709

Navigating When Using Multiple Outlets 711

Summary 713

Chapter 28: Using Animation 715

Preparing the Example Project 716

Disabling the HTTP Delay 716

Simplifying the Table Template and Routing Configuration 717

Getting Started with Angular Animation 719

Enabling the Animation Module 720

Creating the Animation 720

Applying the Animation 724

Testing the Animation Effect 727

Understanding the Built-in Animation States 729

Understanding Element Transitions 730

Creating Transitions for the Built-in States 730

Controlling Transition Animations 732

Understanding Animation Style Groups 737

Defining Common Styles in Reusable Groups 738

Using Element Transformations 739

Applying CSS Framework Styles 741

Summary 743

Chapter 29: Angular Unit Testing 745

Preparing the Example Project 746

Running a Simple Unit Test 748

Working with Jasmine 749

Testing an Angular Component 751

Working with the TestBed Class 751

Testing Data Bindings 755

Testing a Component with an External Template 758

Testing Component Events 760

Testing Output Properties 762

Testing Input Properties 764

Testing with Asynchronous Operations 766

Testing an Angular Directive 768

Summary 770

Index 771

About the Author

Adam Freeman is an experienced IT professional who has held senior positions in a range of companies, most recently serving as chief technology officer and chief operating officer of a global bank. Now retired, he spends his time writing and long-distance running.

About the Technical Reviewer

Fabio Claudio Ferracchiati is a senior consultant and a senior analyst/developer using Microsoft technologies. He works for BluArancio (www.bluarancio.com). He is a Microsoft Certified Solution Developer for .NET, a Microsoft Certified Application Developer for .NET, a Microsoft Certified Professional, and a prolific author and technical reviewer. Over the past ten years, he's written articles for Italian and international magazines and coauthored more than ten books on a variety of computer topics.
